Foreword

The African Organization for Standardization (ARSO) is an African intergovernmental organization established by the United Nations Economic Commission for Africa (UNECA) and the Organization of African Unity (AU) in 1977. One of the fundamental mandates of ARSO is to develop and harmonize African Standards (ARS) for the purpose of enhancing Africa's internal trading capacity, increase Africa's product and service competitiveness globally and uplift the welfare of African communities. The work of preparing African Standards is normally carried out through ARSO technical committees. Each Member State interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, Regional Economic Communities (RECs), governmental and non-governmental organizations, in liaison with ARSO, also take part in the work.

ARSO Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare ARSO Standards. Draft ARSO Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an ARSO Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ARSO shall not be held responsible for identifying any or all such patent rights.

This African Standard was prepared by ARSO Technical Committee on *Milk and Milk Products* (ARSO/TC 04).

Introduction

Butter is a fatty product derived exclusively from milk and/or products obtained from milk, principally in the form of an emulsion of the type water-in-oil.

This African Standard seeks to lay down requirements for the acceptable production of Butter in order to ensure quality, consumer safety and promote fair trade practices.

In elaborating this Standard, references were made to inputs from Manufacturers, National and International standards which are hereby duly acknowledged.

Butter — Specification

1 Scope

This African Standard specifies requirements, sampling and test methods for butter, intended for direct consumption, or further processing.

2 Normative references

The following referenced documents are indispensable for the application of this Standard. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ARS 1034 and the following shall apply.

3.1
butter
fatty product derived exclusively from milk and/or products obtained from milk, principally in the form of an emulsion of the type water-in-oil

4 Composition and requirements

4.1 Essential raw ingredients

Milk and/or products obtained from milk

4.2 Permitted ingredients

a) Potable water

b) Sodium chloride and/or other types of food grade salt

c) Starter cultures of harmless lactic acid and/or flavour producing bacteria

4.3 Compositional requirements

Butter shall meet the compositional requirements given in Table 1 when tested in accordance with the test methods specified therein. Butter may be classified as identified in Table 1 and meet the compositional requirements, as shown.

Table 1 — Compositional requirements for butter

Characteristics	Permissible limit, % (m/m)	Test method
Milk fat content, min	80,0	Refer to CXS 234
Water content, max	16,0	
Milk solids-not-fat content, max	2,0	

5 Food additives

Food additives may be used and only within the limits specified in CXS 192 - Category 02.2.1 (Butter).

6 Contaminants

6.1 Heavy metals

The products covered by this African Standard shall comply with those maximum limits for metal contaminants specified in CXS 193.

6.2 Aflatoxins

When tested in accordance with ISO 14501, the level of aflatoxin M1 shall not exceed 0.5 µg/kg.

6.3 Pesticide residues

Pesticide residue limits shall be in accordance with limits set by the Codex Alimentarius Commission for the product covered by this Standard.

 © ARSO 2025 — All rights reserved

6.4 Veterinary drug residues

Veterinary drug residue limits shall be in accordance with limits set by the Codex Alimentarius Commission for the product covered by this Standard.

7 Hygiene

The products covered by this African Standard shall be produced, prepared and handled in accordance with the provisions of the appropriate sections of ARS 53 and ARS 1036.

Butter shall be free from microorganisms and products originating from microorganisms in amounts which may represent a hazard to human health.

Butter shall comply with microbiological limits given in Table 3 when tested in accordance with the test methods specified therein.

Table 3 – Microbiological limits for butter

Micro-organisms	**Sampling plan**		**Limits**		**Test method reference**	**The stage at which the parameter is applied**
	n	**c**	**m**	**M**		
Salmonella	5	0	Absence in 25g		ISO 6579-1	Final product during shelf-life
Listeria monocytogenes	5	0	Absence in 25g		ISO 11290-1	Final product during shelf-life
Coagulase-positive Staphylococci	5	1	10 cfu/g	10^2 cfu/g	ISO 6888-1 ISO 6888-2	Final product during shelf-life
E. Coli	5	2	10 cfu/g	10^2 cfu/g	ISO 16649-1 or -2	Final product during shelf-life
Enterobacteriaceae	5	2	10 cfu/g	10^2 cfu/g	ISO 21528-2	At the end of process
Total Aerobic mesophilic bacterial count	5	1	10^2 cfu/g	10^3 cfu/g	ISO 4833-1	During the process

Note:
n = number of units comprising the sample;
c = number of sample units giving values between m and M;
m= The level of the microbiological criterion required in the product;
M= Value or level of microbial limit not to be reached or greater than in any unit of the sample.

8 Packaging

Butter shall be packaged in suitable food grade containers which will safeguard the hygienic, nutritional, technological, and organoleptic qualities of the product during dispatch, transport and use of the product until the end of its shelf life.

9 Labelling

In addition to the provisions of ARS 56, the following specific provisions shall apply:

© ARSO 2025 — All rights reserved

9.1 Name of the food

(i) The name of the food shall be “Butter”. The name “butter” with a suitable qualification shall be used for butter with more than 95% fat.

(ii) Butter may be labelled to indicate whether it is salted or unsalted according to national legislation.

9.2 Declaration of total fat content

If the consumer would be misled by the omission, the milkfat content shall be declared in a manner found acceptable in the country of sale to the final consumer, either

(i) as a percentage by mass, or

(ii) in grams per serving as quantified in the label provided that the number of servings is stated.

9.3 Labelling of non-retail containers

Information required in clause 8 of this Standard needed to be complied with the requirements mentioned in CXS 346.

10 Methods of sampling

For checking the compliance with this standard, the methods sampling contained in ISO 707, shall be used.
